Drawing Seasons: One Tree, Four Panels

Original worked example / unchanged complete key

Prompt: A student draws four panels. Spring has blossom marks and a rain cloud. Summer has full leaf marks and a sun. Autumn has leaf marks, falling leaves and a wind line. Winter has bare branches and a snowflake. The trunk base is at 3 cm from the bottom in all panels. Check the plate against the convention.

Answer: The plate is valid. Each panel has one season label, one tree state and one weather cue. The trunk base height is consistent at 3 cm. The leaf and blossom marks are consistent with the stated key. No panel mixes seasons. The winter panel correctly shows bare branches.
