Timed Gesture Pose Drawing: Balance and Proportion Checks

Original task 1 / independent drawing and calculation

Task 1

In a 30-second pose box, a described seated figure has the base of support at the seat contact and the upper body leaning slightly left. Draw gesture lines and a balance line. Then state where the balance line should pass.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Timed Gesture Pose Drawing: Balance and Proportion Checks

Original task 2 / independent drawing and calculation

Task 2

A 60-second sketch shows head-to-hip = 2 units and hip-to-foot = 5 units. Using the same unit, calculate the total height and the difference between the two parts.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Timed Gesture Pose Drawing: Balance and Proportion Checks

Original task 3 / independent drawing and calculation

Task 3

You record a comparison unit as the x-height of a capital H drawn at 6 mm tall (hypothetical example). In a 2-minute sketch, the shoulder width counts 4 units and the head-to-hip distance counts 3 units. State which is larger and by how many units.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Timed Gesture Pose Drawing: Balance and Proportion Checks

Original task 4 / independent drawing and calculation

Task 4

After three timed rounds, a learner's 30-second sketch has a balance line through the right foot, the 60-second sketch has it through the left foot, and the 2-minute sketch has it through the right foot again. Write one self-comparison note that identifies the inconsistency and one next check.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.
