Googly Eyes Drawing: Dome, Highlight, and Offset Pupil

Original worked example / unchanged complete key

Prompt: Draw a googly eye with a dome 40 mm wide, a pupil 16 mm wide offset 6 mm to the right, a highlight 5 mm wide on the upper left, and two motion lines on the left. Check the margins.

Answer: Dome width 40 mm, pupil 16 mm, offset 6 mm right. The pupil stays inside because the dome half-width is 20 mm and the pupil half-width is 8 mm; 6 mm offset plus 8 mm equals 14 mm, leaving a 6 mm margin on the right. Highlight 5 mm on the upper left is smaller than the pupil and separate. Two motion lines on the left stay outside the dome. The drawing passes the checklist.
