Draw Two Hands Forming a Heart: Finger-Curl Steps

Original worked example / unchanged complete key

Prompt: Draw two hands forming a heart with the thumbs meeting at the center and the curled fingers making two lobes. Use a hand span of 16 cm as a hypothetical example, half-span 8 cm, and a fingertip gap of 0.5 cm.

Answer: Place the center line and baseline. Mark midline at a chosen x-height of 1.5 cm. Put Hand A thumb tip on the center line at midline height and draw the thumb curve to the wrist. Draw the palm arc outward 8 cm from center at the baseline. Mirror for Hand B. Curl the index finger in three segments, then middle, ring, and little, shortening each by 1 cm. Mirror for Hand B. Leave a 0.5 cm gap between fingertips. Erase guides and smooth the contour. The result is a paired-hand heart with two rounded lobes and a visible inner cleft.
