Draw a Bodhi Tree: Heart-Shaped Leaves and Drooping Branches

Original worked example / unchanged complete key

Prompt: On a 20 cm by 28 cm sheet, draw a bodhi tree with a trunk base width of 4 cm tapering to 2 cm at the first branch, three drooping branches, and five heart-shaped leaves of length 4 cm. Check that two branches end 6 cm lower than they start.

Answer: Trunk drawn with curved sides from 4 cm to 2 cm; first branch at about 18 cm height. Three branch curves start at 18 cm, 15 cm, and 12 cm and end at 12 cm, 9 cm, and 6 cm, so each ends 6 cm lower. Five leaves of 4 cm length placed on outer thirds, each with notch at stem and point opposite, midrib plus four side veins per side. Rubric score: trunk 2, droop 2, leaf shape 2, veins 1; improvement note: reduce vein clutter.
