Draw a Cacao Tree: Trunk Pods and Broad Leaves

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw a Cacao Tree: Trunk Pods and Broad Leaves

Worked example / complete source key

Draw a cacao tree with a tapered trunk, three main branches, three pods attached to the trunk, and broad leaves at branch ends. Use light construction lines and dark final outlines.

Answer: A completed drawing shows a vertical trunk tapering upward, three ascending branches alternating sides, three oval pods with short stalks attached to the trunk at different heights and angles, and broad pointed leaves clustered at branch ends. Construction lines are light or erased; final outlines are dark. Pods have two to four lengthwise ridge lines. The canopy is open enough to see branch junctions.
