Draw a Dachshund: Elongated Body and Drooping Ears

Original task 1 / independent drawing and calculation

Task 1

A side-profile sketch has a torso length of 10 cm, leg height of 2 cm, and ear length of 3 cm. State the torso-to-leg ratio and ear-to-leg ratio, and say whether the proportions fit the dachshund convention.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Draw a Dachshund: Elongated Body and Drooping Ears

Original task 2 / independent drawing and calculation

Task 2

You have a 15 cm wide practice area. Choose hypothetical values for torso length, leg height, and ear length that fit with 1 cm margins on each side, and check the ratios.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Draw a Dachshund: Elongated Body and Drooping Ears

Original task 3 / independent drawing and calculation

Task 3

A drawing shows a torso of 9 cm, legs of 4 cm, and ears of 2 cm. Identify the proportion problems and give corrected hypothetical values that keep the torso at 9 cm.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Draw a Dachshund: Elongated Body and Drooping Ears

Original task 4 / independent drawing and calculation

Task 4

Describe how to redraw a side-profile dachshund from a practice outline using a torso of 8 units, legs of 2 units, and ears of 3 units. Include the order of construction and one check.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.

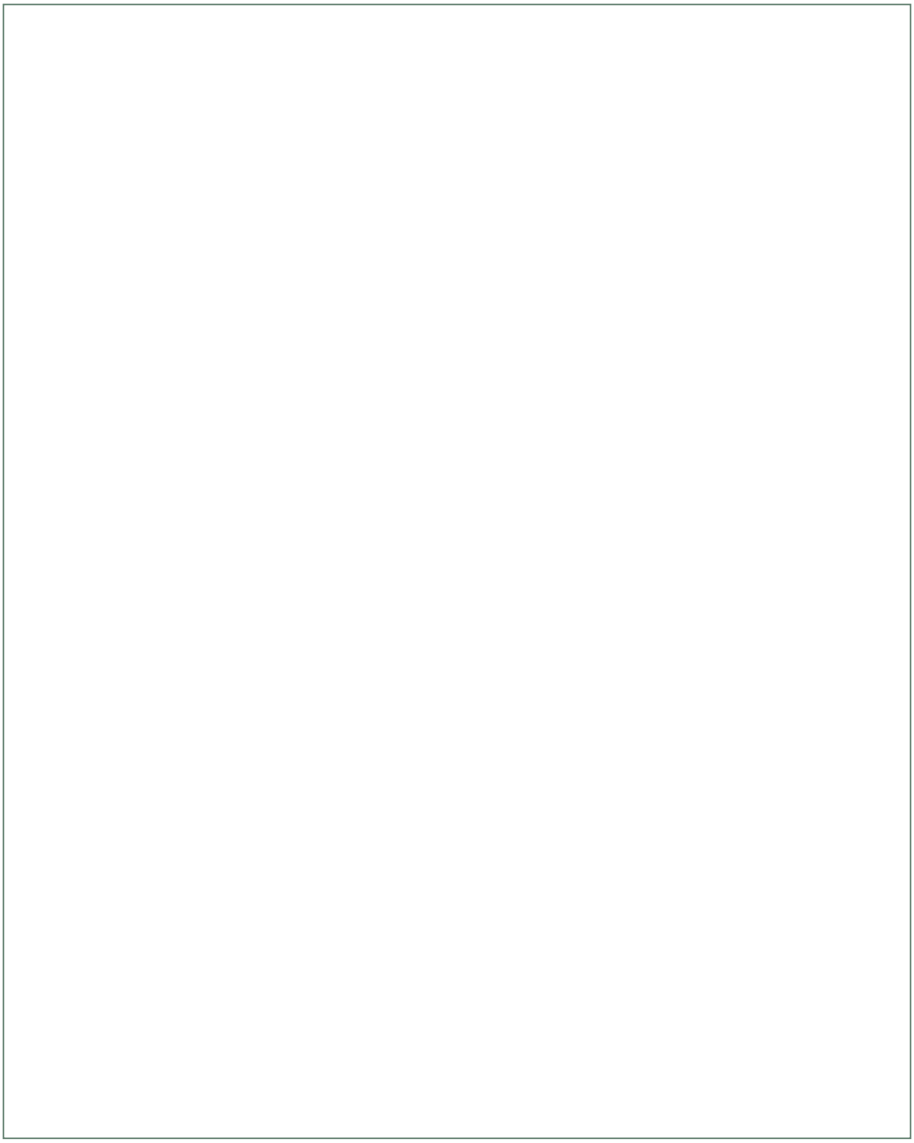

Draw a Dachshund: Elongated Body and Drooping Ears

Task 1 / practice

Dachshund side-profile models / hypothetical cm ratios / chosen extra dimensions labelled

Measure only the named torso/leg/ear quantities; state every chosen additional dimension. In Task 3 preserve the 9 cm torso while correcting the legs and ears, and label the given error separately.

Independent drawing field / use the original task and record your own checks.

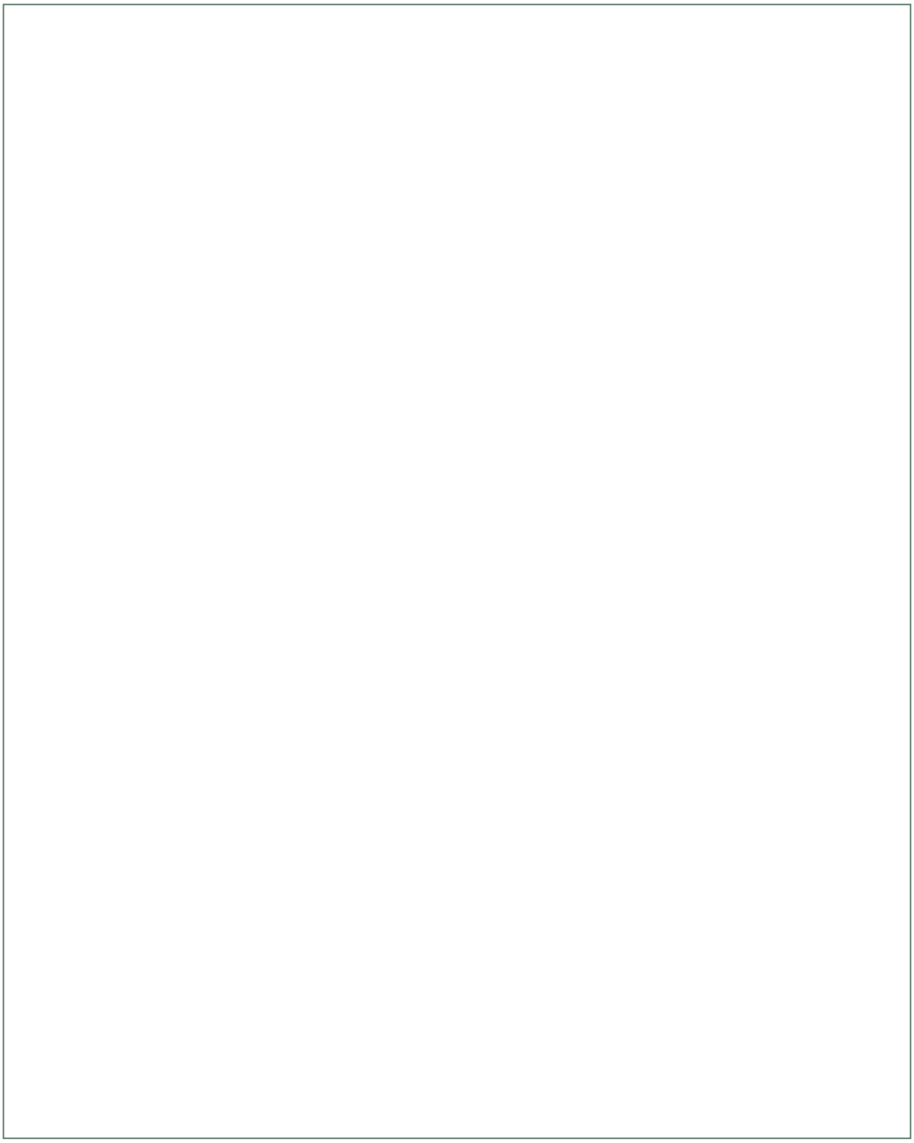

Draw a Dachshund: Elongated Body and Drooping Ears

Task 2 / practice

Dachshund side-profile models / hypothetical cm ratios / chosen extra dimensions labelled

Measure only the named torso/leg/ear quantities; state every chosen additional dimension. In Task 3 preserve the 9 cm torso while correcting the legs and ears, and label the given error separately.

Independent drawing field / use the original task and record your own checks.

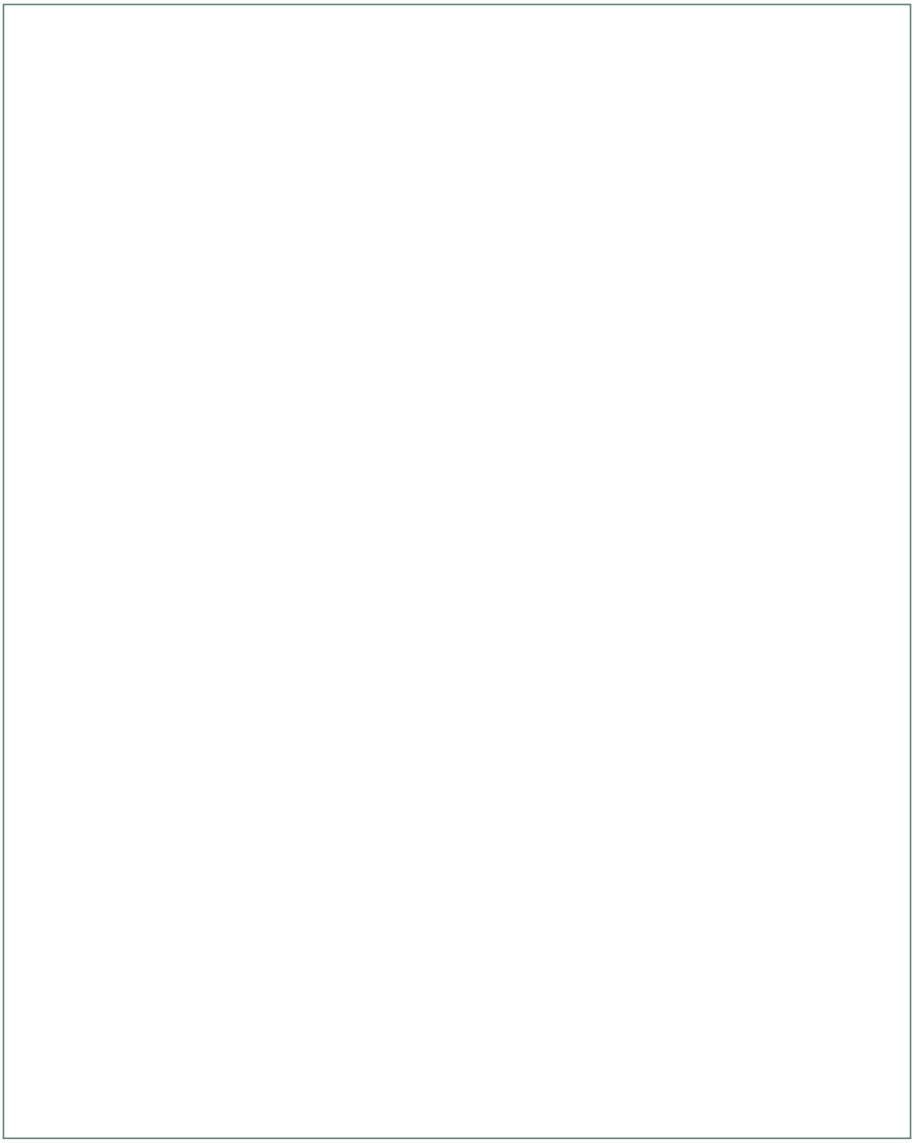

Draw a Dachshund: Elongated Body and Drooping Ears

Task 3 / practice

Dachshund side-profile models / hypothetical cm ratios / chosen extra dimensions labelled

Measure only the named torso/leg/ear quantities; state every chosen additional dimension. In Task 3 preserve the 9 cm torso while correcting the legs and ears, and label the given error separately.

Independent drawing field / use the original task and record your own checks.

Draw a Dachshund: Elongated Body and Drooping Ears

Task 4 / practice

Dachshund side-profile models / hypothetical cm ratios / chosen extra dimensions labelled

Measure only the named torso/leg/ear quantities; state every chosen additional dimension. In Task 3 preserve the 9 cm torso while correcting the legs and ears, and label the given error separately.

Independent drawing field / use the original task and record your own checks.
