Draw a Hawaiian Lei: Strand Construction and Flower Layering

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw a Hawaiian Lei: Strand Construction and Flower Layering

Worked example / complete source key

A student draws a short lei with five flowers on a 12 cm arc. They mark centers at 2 cm, 4 cm, 6 cm, 8 cm, and 10 cm from the left end. They use a convention where each flower overlaps the one to its left. Describe how to check the drawing.

Answer: Trace the strand from left to right. You should pass five visible centers in order at the marked intervals. For each neighboring pair, the right flower should sit slightly over the left flower's edge. If any center is hidden or the overlap reverses, adjust that flower. The spacing check is that the gaps between centers are equal at 2 cm each, using the hypothetical values given.
