Draw a Jack Russell Terrier: Proportions, Ears, and Face

Original tasks 1, 2 / independent work

Task 1

Using x-height 10 units, calculate the expected chest depth and leg length for a Jack Russell terrier side view. Then state one check you would perform on the drawing.

Task 2

A drawing shows a terrier with a body length of 14 units and an x-height of 10 units. Is the build square? Explain and give a correction.

Draw a Jack Russell Terrier: Proportions, Ears, and Face

Original tasks 3, 4 / independent work

Task 3

Describe how to place the ears and eyes on a head circle with a vertical center line and a stop halfway down. Include one valid alternative.

Task 4

List two differences between a Jack Russell terrier outline and a generic dog base, and explain how you would verify each in your drawing.
