Realistic Sun Sketch: Disc, Rays, and Shading

Original worked example / unchanged complete key

Prompt: On a 15 cm wide practice area, draw a sun with a 6 cm disc, 12 rays in a short-medium-long-medium pattern, and three shading zones. Describe the result.

Answer: The centered 6 cm disk leaves about 4.5 cm on each side. Twelve stylized rays start at the edge with even gaps and follow the repeating length pattern. The center third is brightest, the middle third a soft mid-tone, and the outer third subtly dimmer, with blended transitions.
