Drawing on a Shoe Outline: Map Toe Box, Side Panel and Lace Zones

Original worked example / unchanged complete key

Prompt: A side-view outline is 120 mm long. The side panel is 60 mm wide. You choose a hypothetical repeat of 10 mm. How many repeats fit, and where do you place the first repeat?

Answer: Six repeats fit because 60 divided by 10 equals 6. Place the first repeat 5 mm from the front seam of the side panel, then continue every 10 mm. Check by measuring the last repeat: it should end about 5 mm from the back seam, leaving even margins.
