Easy Wizard Drawing: Robe, Hat, and Staff Construction

Original worked example / unchanged complete key

Prompt: Draw a wizard with a 12 cm figure height, a staff 13 cm tall, a robe hem 6 cm wide, shoulders 3 cm wide, and a hat cone 5 cm tall. Place the staff on the left.

Answer: Draw a vertical staff line 13 cm long on the left and a ground line at its base. Mark a 6 cm hem centered to the right of the staff, draw slanted sides up 7 cm to a 3 cm shoulder line, and close the trapezoid. Add three short fold lines at the hem. Draw a 4 cm hat brim centered on the shoulders and two lines meeting 5 cm above for the cone. Draw the left arm from the shoulder to the staff at chest height with a small hand shape, and the right arm hanging to mid-robe. Check that the hem is wider than the shoulders and the staff is vertical.
