Tattoo Shading Practice: Gradient Blending and Stipple Density Drills

Original tasks 1, 2 / independent work

Task 1

In a 2 cm square, you count 6 dots. Estimate the density in dots per square centimeter.

Task 2

A gradient strip has four segments. Segment 2 reads lighter than segment 1 when squinted. Describe one fix.

Tattoo Shading Practice: Gradient Blending and Stipple Density Drills

Original tasks 3, 4 / independent work

Task 3

A stipple grid cell measures 1 cm by 1 cm and contains 12 dots. A neighboring cell contains 18 dots. Which cell should read darker?

Task 4

On a blank shape, the right third has dense stipple and the left third has a light gradient. The middle reads as a hard stripe. Name one adjustment.
