Directed Drawing Bunny: Sequenced Shape Steps in Practice Boxes

Original worked example / unchanged complete key

Prompt: A student draws a body oval 4 cm tall and 3 cm wide in box 1, then adds two ears each 3 cm long and two paw circles each 1 cm across. Check the drawing against the convention.

Answer: The oval is taller than wide (4 cm by 3 cm), so it matches the convention. Each ear is 3 cm long and touches the top of the oval, so the ears are attached. Each paw is 1 cm across, which is smaller than the body width of 3 cm, so the paws read as paws. The drawing passes the convention check.
