Simple Corgi Drawing: Body Proportion, Ears, and Short-Leg Construction

Original tasks 1, 2 / independent work

Task 1

A corgi drawing has a body length of 12 units. What should the body height be if you follow the half-length guide? What is the suggested leg length?

Task 2

You draw a head 5 units tall. Using the ear guide, how tall should each ear be? Describe the ear shape in words.

Simple Corgi Drawing: Body Proportion, Ears, and Short-Leg Construction

Original tasks 3, 4 / independent work

Task 3

A sitting corgi has a body length of 9 units. The front legs are drawn 3 units long. Is this consistent with the short-leg guide? Explain.

Task 4

In a standing corgi sketch, the body length is 14 units and the body height is drawn as 9 units. Identify the proportion mistake and give a corrected height.
