Draw a Duck Couple: Paired Pose, Overlap, and Spacing

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw a Duck Couple: Paired Pose, Overlap, and Spacing

Worked example / complete source key

On a page with two slots, draw a duck couple where the left duck faces right and the right duck faces left. The left duck is in front. Use a head gap of about one bill length and a body gap of about half a body width. Describe the overlap order and spacing check.

Answer: Draw the left duck completely first, including its bill pointing right. Draw the right duck only up to the left duck's body outline, then continue on the far side. The right duck's bill points left toward the left duck. The closest head gap is about one bill length; the body gap is smaller, about half a body width. One overlap arrow at the body crossing confirms the left duck is in front. Covering either duck leaves a complete single duck and a clear suggestion of a partner.
