Draw a Jumping Fish: Arc, Splash, and Fin Placement

Original worked example / unchanged complete key

Prompt: On a page with a waterline at 6 cm from the bottom, draw a shallow arc peaking at 12 cm above the waterline. Place one fish at the peak with a dorsal fin swept upright, a pectoral fin angled out, and a fan tail pointing down. Add three droplets at takeoff and three at entry.

Answer: The arc rises smoothly from the waterline to 12 cm and returns. The fish oval sits at the peak, tilted slightly nose-down. The dorsal fin is a rounded triangle on the back, the pectoral fin is a small flap near the head, and the tail fan points down. Three droplets sit above the takeoff point and three above the entry point, all near the waterline.
