Draw an Epic Knight: Armor Layers and Stance

Original worked example / unchanged complete key

Prompt: Draw a knight with a helm, pauldron, cuirass, and greaves, standing with feet apart and holding a sword. Use a center line and check balance.

Answer: First draw the body frame: head oval, torso rectangle, two arms, two legs. Add the helm over the head, then pauldrons over the shoulders, then the cuirass over the torso, then greaves over the lower legs. Draw a vertical center line. Place the feet apart, one slightly forward. Place the hips near the center line and the shoulders above. Add a sword in one hand, keeping the arm slightly away from the body. Check that the head-to-ground line lands between the feet and that the weapon does not cover the helm.
