Realistic Rabbit Drawing: Fur Direction and Body Proportion

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Realistic Rabbit Drawing: Fur Direction and Body Proportion

Worked example / complete source key

A learner sketches a rabbit with a 3 cm head, a 7.5 cm body, and 3 cm ears. They draw back fur from tail to head and side fur upward. Check the proportions and fur direction.

Answer: Proportions are correct: body is 2.5 head lengths (7.5 ÷ 3 = 2.5) and ears are 1 head length. Fur direction is wrong: back fur should run head to tail, and side fur should flow downward, not upward. Fix by reversing the back strokes and redrawing side strokes downward.
