Draw a Snare Drum: Shell, Lugs, and Stand Construction

Original worked example / unchanged complete key

Prompt: Draw a snare drum in front three-quarter view with a shell 10 units wide and 6 units high, eight lugs, a centered stand post, and a tripod base. Label shell, lugs, post, and legs.

Answer: A completed drawing shows a cylinder with matching top and bottom ellipses, eight evenly spaced lug blocks, short tension rods, a centered post about 10 units long, and three equal tripod legs. Labels are placed clearly. The width-to-height ratio is about 1.67 to 1, and the post is centered under the shell.
