Standing Posture Drawing: Balance Line and Limb Alignment

Original worked example / unchanged complete key

Prompt: On a page, the left ankle center is at horizontal position 6 cm and the right ankle center is at 14 cm. The balance line is drawn at 10 cm. The knee marker is at 45 cm height, the hip marker at 85 cm, the shoulder marker at 130 cm, and the ear marker at 150 cm. Check the midpoint and the vertical order.

Answer: Midpoint = (6 + 14) / 2 = 10 cm, so the balance line passes through the midpoint. Vertical order: 45 cm knee < 85 cm hip < 130 cm shoulder < 150 cm ear, which is correct. The structure is checkable and the standing posture is readable.
