Zookeeper Drawing: Uniform, Tools, and Pose Construction

Ordinary topic reference / separately checked pixels

Zookeeper / chosen head units and handwriting x-height / two vest pockets / source-specific measurements

Print 1:2. Two pockets only; flap height = 10 mm in worked labels.

The worked model uses eight 3 cm heads = 24 cm; Task 1 separately uses six 4 cm heads = 24 cm. The two hypothetical constructions must not be conflated. Worked shoulders are 6 cm, hips 4.5 cm, belt and pocket flaps 1 cm. Handle ends remain below the face, palm hides its central segment, thumb is opposite fingers. Measures are chosen classroom values, not body or equipment standards.

Zookeeper Drawing: Uniform, Tools, and Pose Construction

Original worked example / unchanged complete key

Prompt: Draw a zookeeper standing with feet on the baseline, one hand holding a long-handled scoop, and a vest with two pockets. Use a head unit of 3 cm and an x-height of 1 cm as hypothetical examples.

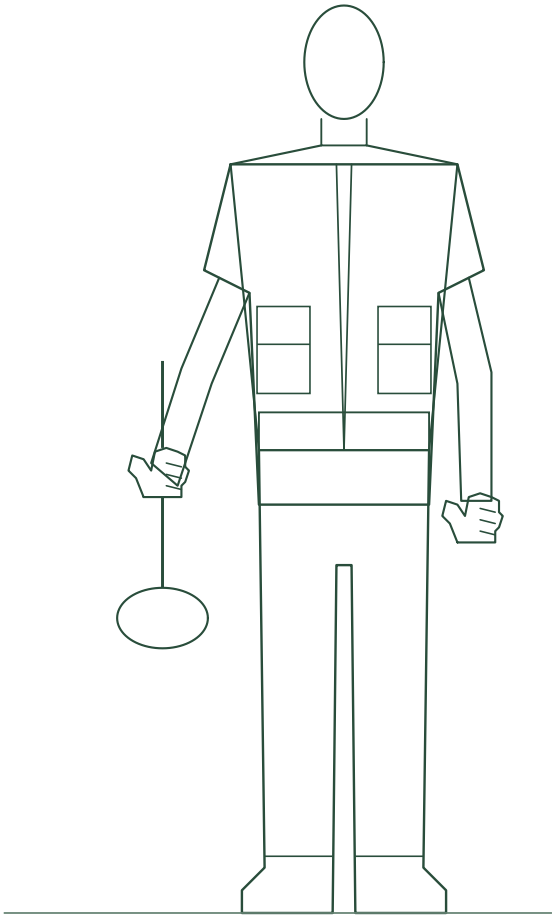

Answer: The figure is eight head units tall (24 cm). The shoulders are two head units wide (6 cm), the hips one and a half head units (4.5 cm). The belt is one x-height wide (1 cm) and sits at the waist mark on both sides. Each pocket flap is one x-height tall (1 cm). The scoop handle is six x-heights long (6 cm) and passes through the palm; the thumb is opposite the fingers. Feet touch the baseline and the head is centered.
