Asado Drawing: Grill, Skewers, and Ember Shading

Original worked example / unchanged complete key

Prompt: Draw a small asado grill 12 cm wide and 8 cm tall with three skewers and layered ember shading. Use the three-value convention.

Answer: A light rectangle 12 cm by 8 cm forms the firebox. Grate bars are spaced 1.5 cm apart above the rim. Three skewers cross the grate at slightly different angles, each with four rounded food chunks. Ember shading begins with pale ash patches, adds warm coal in the center, and places small hot cores in two clusters. A cast shadow grounds the grill. The drawing is checked by confirming skewer contact, even bar spacing, and three distinct ember values.
