Pencil Fire Drawing: Flame Shapes and Tonal Layering

Original worked example / unchanged complete key

Prompt: On a 15 cm by 20 cm sheet, draw a single leaning flame about 12 cm tall using a 2H envelope, two inner shapes, and light-to-dark layering with 2H, HB, and 2B pencils. Leave the core white and darken the outer edge.

Answer: A completed pencil drawing showing a leaning flame with a wide base, two offset inner tongues, a paper-white core near the base, HB mid tones along the edges, and 2B accents at the outer silhouette and in the gap between tongues. Construction lines are erased, and the background remains light.
