Fire and Ice Drawing: Contrasting Elements with Texture and Color

Original worked example / unchanged complete key

Prompt: Draw a small flame on the left and a small ice block on the right, each about 6 cm tall, using the construction and texture steps. Use a pencil and two colors if available.

Answer: A finished sketch with a teardrop flame leaning slightly right, curved tapering strokes from a wide base, warm mid-tone with a brighter core, and a blocky ice mass with three visible facets, straight edge strokes and short cross-strokes, cool mid-tone with bright upper facets. The divider is light or erased, and the two textures are clearly different.
