Drawing with Description: Turn Written Cues into Sketches

Original worked example / unchanged complete key

Prompt: Description: A flat field with a low stone wall along the left edge. A round bucket sits right of the wall. A farmer stands behind the bucket, holding a long tool in her right hand. Two small trees are on the right side of the field, one nearer than the other. Draw the scene using the convention: outline pencil, hatch shadow, 1 unit equals one finger width, labels in normal handwriting.

Answer: Convention line written at top. Scale bar drawn and labeled 1 unit. Ground line drawn across the panel. Low stone wall drawn as a row of small rectangles along the left edge. Round bucket drawn as an oval right of the wall. Farmer drawn behind the bucket, partly hidden by it, with a long tool in her right hand. Two small trees drawn on the right side, the nearer one larger and lower on the page. Cue box ticked: field, wall left, bucket right of wall, farmer behind bucket, tool right hand, two trees right, near and far. Labels added for wall and bucket in normal handwriting.
