Draw a Coiled Serpent: Scale Rows and Open-Mouth Construction

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw a Coiled Serpent: Scale Rows and Open-Mouth Construction

Worked example / complete source key

A student draws a coil with three turns spaced about 2 cm apart and a mouth panel with a 45-degree opening. The tongue extends 1 cm past the lower jaw tip. Identify one correction and one check.

Answer: Correction: shorten the tongue so it stays inside the lower jaw. Check: measure the turn spacing; the outer turn should be about 4 cm from the center if three turns are spaced 2 cm apart (two intervals).
