Draw a Small Creature from Shape Blocks: A Step-by-Step Guide

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw a Small Creature from Shape Blocks: A Step-by-Step Guide

Worked example / complete source key

A creature has a total height of 9 units. The head zone is 3 units, the body zone is 3 units, and the leg zone is 3 units. The body block is 4 units wide, centered on the midline. Where should the body block's left and right edges be relative to the midline?

Answer: The body block is 4 units wide, so each side is 2 units from the midline. The left edge is 2 units left of the midline and the right edge is 2 units right of the midline.
