Bluegill Fish Drawing: Body Shape, Fin Placement, and Scale-Row Counting

Original worked example / unchanged complete key

Prompt: Draw a bluegill side view on paper 20 cm wide. Use body length 16 cm and body depth 8 cm. Place all five fin groups and draw a scale-row grid with 12 lines, excluding 2 lines outside the counted flank zone. Record the count.

Answer: Body outline: 16 cm snout-to-caudal-base, 8 cm depth. Dorsal fin from vertical midline to near caudal-fin base; anal fin below rear dorsal; caudal fin at base; pectoral fin behind gill cover angled down; pelvic fin below and slightly behind pectoral. Grid: 12 lines drawn, 2 excluded, recorded count 10. Labels placed outside the outline.
