Draw a 1964 Impala: Body-Line and Trim Practice

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw a 1964 Impala: Body-Line and Trim Practice

Worked example / complete source key

Using a hypothetical body length of 18 cm and roof height of 6 cm, describe how to place the front wheel arch center and the main trim line.

Answer: Divide the body length into three equal parts of 6 cm. Place the front wheel arch center at the end of the first part (6 cm from the front). Draw the main trim line parallel to the ground at about half the body height, using the beltline as a guide. Check that the arch center is 6 cm from the front and that the trim is horizontal.
