Black and White Bird Drawing: Feather Groups, Value Contrast, and Tonal Shading

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Black and White Bird Drawing: Feather Groups, Value Contrast, and Tonal Shading

Worked example / complete source key

A bird study has three groups: breast target value 1, wing coverts target value 3, flight feathers target value 5. Check adjacent contrast and state whether the plan passes.

Answer: Breast to wing coverts difference is 2; wing coverts to flight feathers difference is 2. Both meet the minimum two-step contrast, so the plan passes.
