Combat Boot Drawing: Proportions, Laces, and Lug Sole

Original worked example / unchanged complete key

Prompt: Draw a side-view combat boot with heel-to-toe length 12 cm and ankle height 4 cm. Use five eyelets per row and a sole thickness of 1 cm. Describe the lace crossings and lug count.

Answer: Baseline 12 cm; ankle top 4 cm above heel. Two parallel eyelet rows with five eyelets each, spaced evenly. Four crossing pairs plus top tie. Sole band 1 cm thick with six evenly spaced lugs. Check: 12 divided by 4 equals 3, matching the guide ratio; five eyelets per row give four crossings.
