Kitchen Table Drawing: Top Shape, Legs, and Attachment

Original worked example / unchanged complete key

Prompt: Draw a kitchen table with an elliptical top 12 units wide and 8 units deep, four legs 10 units long, and a taper from 2 units at the top to 1 unit at the floor. Show attachment brackets.

Answer: Draw a crosshair, mark 12 units horizontally and 8 units vertically, and sketch a smooth ellipse. Draw an inner footprint ellipse inset by 1 unit. Mark four leg centers at the footprint compass points. Draw four vertical legs down to a single floor line 10 units below the top. Taper each leg from 2 units at the top to 1 unit at the bottom, centered on its leg line. Add a short bracket line under the top at each leg. Erase guides and darken the final outline.
