Capybara Drawing: Body Proportion and Fur Direction

Original tasks 1, 2 / independent work

Task 1

On a 24 cm total body length, mark the four-part division. State the length of each part and the head length check.

Task 2

A chest oval is 8 cm tall, a mid-body oval is 7 cm tall, and a rump oval is 9 cm tall. The back line is level. Which mass is tallest, and where should heavy fur density be placed?

Capybara Drawing: Body Proportion and Fur Direction

Original tasks 3, 4 / independent work

Task 3

Describe the fur-direction strokes for the chest, midsection, rump, and head using the lesson convention. Then state one valid alternative that still describes the form.

Task 4

A drawing has total body length 28 cm and head length 9 cm. The back line slopes downward from rump to shoulders. Identify two proportion or construction errors and state fixes.
