Realistic Frog Drawing: Body Shape and Leg Construction

Original tasks 1, 2 / independent work

Task 1

A student draws a torso oval 4 x-height units wide and 2 units tall, then adds a head oval 3 units wide. Is the frog likely to look compact or stretched? Explain using the lesson’s proportion guide.

Task 2

A hind leg is drawn with thigh 2 units, shin 1 unit, and foot 1 unit. The knee is lower than the ankle. Identify two problems and state how to fix them.

Realistic Frog Drawing: Body Shape and Leg Construction

Original tasks 3, 4 / independent work

Task 3

You are drawing a leaping frog. The front legs extend forward and the hind legs push back. List three checks to confirm the leg construction is still realistic.

Task 4

A texture practice square uses only evenly spaced dots. Suggest two changes to make the texture more realistic and explain how to check the result.
