Draw a Silverback Gorilla: Head, Chest and Knuckle-Walk Pose

Original tasks 1, 2 / independent work

Task 1

On a sheet where you set the shoulder line 15 cm above the ground line, use the convention that head length is about one-fifth of shoulder height. Calculate the target head length and state one landmark you will mark first.

Task 2

A drawing has the shoulder line 4 cm above the hip line and head length 3 cm. Using the convention that shoulder-to-hip difference is about one head length, is the pose acceptable? Explain.

Draw a Silverback Gorilla: Head, Chest and Knuckle-Walk Pose

Original tasks 3, 4 / independent work

Task 3

Describe where to place the knuckle contact points and foot contact points for a knuckle-walk pose, and state one check that confirms the limb placement.

Task 4

A learner's chest width is 5 cm and head width is 4 cm. Using the convention that chest width is about one and a half head widths, calculate the target chest width and state whether the drawn chest is too wide or too narrow.
