Draw a Silly Cat: Exaggerated Expression and Wonky Pose

Original worked example / unchanged complete key

Prompt: Draw a surprised silly cat on a grid. Use a head 3 squares tall, a torso 6 squares tall tilted 20 degrees, one leg 4 squares and one leg 3 squares, and eyes each 1 square tall with small pupils.

Answer: The drawing shows a tilted torso oval 6 squares tall, a head circle 3 squares tall offset to the left, two bent legs of 4 and 3 squares, and an S-curve tail crossing the body. Each eye is 1 square tall, one round and one tall oval, with small pupils and raised eyebrows. The mouth is wide open with a small tongue. The silhouette looks off-balance and the face alone reads as surprised.
