Military Uniform Drawing: Compare Dress and Field Jacket Details

Original worked example / unchanged complete key

Prompt: A student draws a dress jacket with a collar-to-waist distance of 3.0 units and wants 4 evenly spaced buttons. Where should the button centers go, and what is each gap?

Answer: Divide 3.0 by 5 to get 0.6 units per gap. Place button centers at 0.6, 1.2, 1.8, and 2.4 units below the collar base. The remaining gap above the top button and below the bottom button is also 0.6 units. Check: 4 buttons create 5 equal gaps, and 5 times 0.6 equals 3.0 units.
