# Draw a Person Playing Guitar: Posture, Hold, and Hand Placement

Original tasks 1, 2 / independent work

## Task 1

A seated guitarist drawing has a figure height of 15 cm. Using the hypothetical one-third rule, what should the guitar body length be?

## Task 2

You draw a guitar neck 12 cm long and the body 6 cm wide. If the neck-to-body ratio should be about 2:1, is your drawing acceptable?

# Draw a Person Playing Guitar: Posture, Hold, and Hand Placement

Original tasks 3, 4 / independent work

## Task 3

A standing guitarist drawing shows the guitar body hanging from a strap. The figure is 20 cm tall and the guitar body is 8 cm long. Does this meet the hypothetical one-third rule?

## Task 4

In a drawing, the fretting hand has four finger lines spaced 1 cm apart, and the hand width is 4 cm. The strumming hand is drawn 5 cm wide. The viewpoint places both hands at roughly the same distance from the viewer. Using the convention that hands are drawn at the same scale unless depth clearly differs, is this acceptable?
