Draw a Phone Charging: Cable, Plug, and Indicator

Original worked example / unchanged complete key

Prompt: Draw a phone charging on a table with a cable, plug, and indicator. Use a solid outline for the phone and plug, one smooth cable curve, and a filled dot for the indicator. Keep the phone about 7 cm by 14 cm as a hypothetical example.

Answer: A rounded rectangle phone lies tilted on a table edge line. A single smooth cable curve leaves the short edge and meets a small rounded plug with a connector end. A filled dot sits near the cable exit. The plug base aligns with the table edge, and no line crosses the phone body.
