Draw a Reward Token: Ribbon and Badge Construction

Original worked example / unchanged complete key

Prompt: Draw a circular reward token with an 8 cm badge, two ribbon tails 3 cm long, a dashed fold line on each tail, and a 0.5 cm attachment point at the top. Add an inner ring 0.5 cm from the edge and a short word centered inside.

Answer: The drawing shows a circle of 8 cm diameter with a medium outline. An inner ring is drawn 0.5 cm from the edge. A short word sits centered with x-height between baseline and midline. Two ribbon tails emerge from the bottom, each 3 cm long and 1.5 cm wide at the badge edge, tapering to 1 cm. Each tail has a dashed fold line where it meets the badge. A 0.5 cm circle marks the attachment point at the top guide point. The total height from attachment point to tail end is about 11 cm. The two tails are equal within 0.5 cm, and the attachment point is centered within 0.5 cm.
