Draw a Wealthy Man Figure: Posture, Attire and Accessory Placement

Original worked example / unchanged complete key

Prompt: Draw a standing wealthy man figure on a 20 cm by 28 cm sheet (hypothetical example). Use a baseline, midline and contrapposto. Add an open coat, a watch and a pocket square. Check balance with a plumb line.

Answer: The figure stands with the supporting leg straight and the free leg slightly bent. The shoulders tilt opposite the hips. The open coat creates a clean outer silhouette, the watch sits at the wrist, and the pocket square touches the breast pocket. The plumb line from the head falls near the supporting foot, so the figure balances. All measurements use centimeters, and the sheet size is labeled as a hypothetical example.
