Draw a Simple Potted Plant: Stem, Leaf, and Pot Shapes

Original task 1 / independent drawing and calculation

Task 1

Draw a potted plant with a pot top width of 8 units and bottom width of 5 units. Add four leaves, two on each side, attached to a straight stem.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Draw a Simple Potted Plant: Stem, Leaf, and Pot Shapes

Original task 2 / independent drawing and calculation

Task 2

Draw a potted plant with a curved stem and five leaves alternating sides. The lowest leaf should be about 2 units above the rim and the highest about 1 unit below the stem tip.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Draw a Simple Potted Plant: Stem, Leaf, and Pot Shapes

Original task 3 / independent drawing and calculation

Task 3

Draw a potted plant with six leaves all attached on the same side of the stem. State whether this follows the lesson convention and why.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Draw a Simple Potted Plant: Stem, Leaf, and Pot Shapes

Original task 4 / independent drawing and calculation

Task 4

Draw a potted plant and then check it: pot top 7 units, bottom 4 units, stem from rim center, five leaves attached. Identify one possible improvement.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.
