Colored Pencil Eye: Layered Iris and Skin Tone Blending

Original tasks 1, 2 / independent work

Task 1

An eye map has a 36 mm width. The iris circle is drawn with its top on the midline and bottom on the baseline. The pupil is 8 mm across and centered. State the layer order and one value check.

Task 2

A student colors the iris base, then adds deep accent, then mid tone, and finally colors the highlight with dark pencil. Identify two mistakes and give fixes.

Colored Pencil Eye: Layered Iris and Skin Tone Blending

Original tasks 3, 4 / independent work

Task 3

Skin around an eye uses light peach base and mid tan crease, but the blend looks patchy and skin color crosses the iris rim. Give two corrective steps using the lesson method.

Task 4

A drawing uses a green iris base, a mid green radial layer, and a reserved highlight. Skin uses light olive base and mid brown crease. The iris rim is crisp. Decide whether this is valid under the rubric and state one refinement.
