Goat Eyes Drawing: Rectangular Pupil and Lid Shape

Original worked example / unchanged complete key

Prompt: Draw a goat eye on a 10 cm by 10 cm area. Use a hypothetical eye opening 6 cm wide and 3 cm tall. Place a horizontal rectangular pupil 3 cm wide and 1 cm tall, centered. Add upper and lower lids and a fur edge.

Answer: The eye opening is a horizontal oval 6 cm wide and 3 cm tall. The pupil is a level rectangle 3 cm wide and 1 cm tall, centered on the midline, leaving about 1.5 cm of eye opening on each side and 1 cm above and below. The upper lid curves just above the pupil, the lower lid follows the bottom curve, and short fur strokes surround the opening without touching the pupil. All checks pass: pupil horizontal, centered, margins visible, eye wider than tall.
