Graffiti Dice Drawing: Lettered Cube Faces with Shading

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Graffiti Dice Drawing: Lettered Cube Faces with Shading

Worked example / complete source key

A cube net has six 6 cm squares. The light comes from the upper left. On the front face, a letter has a baseline at 1 cm from the bottom edge and a midline at 3 cm from the bottom edge. What is the x-height, and which visible face should receive the darkest shading?

Answer: The x-height is 3 cm minus 1 cm = 2 cm. With light from the upper left, the side face on the right receives the darkest shading among the three visible faces.
