Jealousy Drawings: Face, Posture, and Gesture Cues

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Jealousy Drawings: Face, Posture, and Gesture Cues

Worked example / complete source key

Draw a jealousy expression using a lowered inner brow, a side glance, a tightened mouth corner, raised shoulders, and crossed arms. Use an 80 mm by 100 mm face area with baseline and midline 20 mm apart. Describe the drawing and check it.

Answer: Construction: face area 80 mm wide by 100 mm tall; midline 20 mm above baseline. Brow: inner ends 3 mm lower than outer ends. Eye: pupils shifted 2 mm toward the rival on the right. Mouth: right corner tightened 1 mm upward. Posture: shoulders raised 5 mm; torso leaned 10 degrees left, away from the rival. Gesture: forearms crossed, each hand gripping the opposite upper arm. Check: face-only test shows tension and attention; body-only test shows a barrier and lean; cue count is five groups; consistency check finds no contradiction. The drawing reads as jealousy under the stated convention.
