Draw a Half Basketball Outline with Seam Curves

Original worked example / unchanged complete key

Prompt: A half-ball has a 10 cm baseline and a 5 cm midline height. Mark seam start points and state a hypothetical bow depth.

Answer: The baseline thirds are at 3.33 cm and 6.67 cm from the left. Use a hypothetical 0.8 cm inward bow at each seam midpoint. Draw two gentle curves from those start points toward the top midline, keeping both bows equal and inside the half-circle.
