Avocado Cartoon Drawing: Pit, Peel and Face

Original worked example / unchanged complete key

Prompt: Draw a cartoon avocado with a round pit, a narrow peel edge and a happy face. Use a body about 8 cm tall and 6 cm wide as a hypothetical example.

Answer: A rounded pear body 8 cm tall and 6 cm wide; a pit circle about 2.5 cm across centered in the lower half with at least 1 cm space from the outline; a peel edge drawn 0.5 cm inside the body outline; two dot eyes above the pit; a curved smile between the eyes and the pit. These sizes are hypothetical examples; measure your own drawing to confirm the gaps.

Reason: The body is closed and pear-shaped. The pit is inside the lower half with visible space. The peel edge is a separate line inside the body. The face features are above the pit and inside the body, making the happy expression readable.

Check: Measure the pit diameter and the gap to the outline. Confirm the peel edge is a separate continuous line. Confirm eyes and mouth are above the pit and inside the body.
