Cartoon Seashell Drawing: Simplified Spiral and Expressive Face

Original worked example / unchanged complete key

Prompt: Draw a cartoon seashell on a 15 cm by 15 cm paper using the convention. Use a 10 cm by 8 cm shell body, a 3 cm spiral center from the top tip, three arcs with 5 mm gaps, a 1 cm edge, and a 4 cm by 3 cm face box with a happy face.

Answer: The finished drawing shows a rounded triangle shell body 10 cm wide and 8 cm tall. Three smooth arcs curve around a center point 3 cm from the top tip, with about 5 mm between arcs. A 1 cm thick edge runs along the bottom and sides. Inside a 4 cm by 3 cm box in the lower front, two eyes sit 1.5 cm apart above a curved smile. A short highlight line appears on the edge. The spiral is clear, the face is readable, and the expression is happy.
